

Interxion: A Digital Realty Company Expands Global Data Centre Platform With New Facility In The East Of Paris

September 2, 2021

New 12-megawatt data centre provides opportunities for enterprises to scale digital business at the heart of a vibrant connected data community on PlatformDIGITAL®

PARIS, Sept. 2, 2021 /PRNewswire/ -- Interxion: A Digital Realty Company (NYSE: DLR) and leading European provider of carrier- and cloud-neutral colocation data centre solutions, announced today the opening of its latest European data centre in Paris. The new facility is expected provide up to 12 megawatts of IT load capacity and eight data halls providing over 690m² of new colocation facilities. Located less than 30 kilometers east of Paris, PAR12 is Interxion's 12th data centre in the French capital region and is designed to deliver a dynamic community for customers to deploy network hubs on [PlatformDIGITAL®](#), a first of its kind global data centre platform for scaling digital business.

Ideally situated in Ferrières-en-Brie, the new development is the third hub in the Paris region designed to meet the growing needs of cloud service providers seeking to improve the resilience of their services. It complements the two existing data centre hubs in the north and south of Paris. In addition, the new data centre will allow enterprise customers to deploy disaster recovery scenarios from Paris and the east of France using the available low latency networks deployed along the A4 motorway.

As part of PlatformDIGITAL®'s strategic development in France, PAR12 will enable customers to deploy their critical infrastructure with a global data centre provider in one of Europe's leading cloud and interconnection hubs that has been developed over the last twenty years. This digital business hub brings together a dynamic connected data community of network, cloud and content providers as well as enterprise customers. Globally, over 4,000 participants exchange data on Digital Realty's global platform in connected data communities spanning more than 290 data centres on six continents. The company was also recently [recognised](#) as a leader in the IDC Marketscape for Datacentre, Colocation and Interconnection Services for the second consecutive year.

The Ile-de-France capital region in particular continues to be a magnet for French digital business initiatives, with Digital Realty's Data Gravity Index DGx™ projecting data gravity intensity in Paris will more than double annually through 2024. The latest report outlines the impact of this growing megatrend across 53 global metros and 23 distinct industries. Download the full Data Gravity Index DGx™ 1.5 [here](#).

"This new strategic location meets the strong demand from content and cloud providers, who are interested in a third hub in the Paris region," said Fabrice Coquio, Managing Director, Interxion France. "It will also allow companies in the east of France to improve the resilience of their infrastructure by being located close to Paris, while being connected to a high-performance low latency network. It marks a new chapter in Interxion's development in France to continue to meet customers' demand."
